

Shipping Information for PRISM Screens

Important Notes:

- Test agents must arrive at the PRISM Lab **by 12:00pm ET on the submission window deadline**. Any test agents that arrive after this time do not arrive by then will not be included in the screen and held until the following screening window.
- International shipments **MUST** go through the Broad Institute's Customs Broker and should be shipped at least 1 week before the submission deadline.

Planning Your Shipment:

For test agents to successfully enter the screen, the following steps **must** be completed.

Note: The collaborator is responsible for ensuring required documentation is accurate and test agents are delivered within the submission window.

- Ensure you have completed a PRISM Submission Form in its entirety and have received confirmation from the PRISM Team **before** shipping test agents.
- Label each test agent vial clearly with: your name, your organization's name, the test agent's name, volume, concentration, and the PRISM screen (i.e. MTS0[xx] or CPS0[xx])
- Include a physical copy of your submission confirmation from PRISM in your shipment. If sending multiple test agents in a multi-well plate, please also include a hard copy of your plate map.
- Ensure your vials are securely packaged and on dry ice or ice packs (if necessary). If your test agents require dry ice or ice packs, coordinate with your shipper to make sure ice is replenished should your shipment face delays.
- Test agents will be stored in the condition indicated on your submission form (i.e. room temperature, 4°C, -20°C).
- **Broad's receiving dock is open 9:00am - 4:00pm, Mondays through Friday.** Any shipments scheduled should arrive on business days only.
 - Any shipments scheduled for Friday delivery should be guaranteed to arrive before 12:00pm so they can be properly stored before our lab closes for the weekend.
 - **Packages cannot be received outside of the above times, including weekends.** Please communicate this with your shipper and plan accordingly.
- Please email prism@broadinstitute.org when you have shipped your test agent(s), and include a tracking number. If you are sending multiple test agents in a multi-well plate, please send a digital copy of your plate map.

Shipping Address:

Send to: *The Broad Institute, Inc.*
 Attn: Anthony Fazio
 300 Binney St
 Lab 5400 (PRISM)
 Cambridge, MA 02142
 Tel: (617) 714-7000

For International Shipments Only:

If shipping test agents internationally, please review and follow the information below to ensure shipments are cleared through customs without any delay.

Note: International shipping requirements vary by country. **Collaborators are responsible for coordinating their shipments and communicating with their shipping companies directly**, including the completion of any documentation required to ship their test agents to the United States.

- ALLOW AT LEAST ONE WEEK FOR DELIVERY.
- Download and complete the brief [TSCA certificate](#) and send it to the customs broker to ensure the information is correct. Include this document in your shipment.
- Customs Broker Information:
 - The customs broker should **always** be listed as:
 Tom Auffrey of E. Sidney Stockwell Co., Inc.
 Email: tom@esstockwell.com
 Phone: +1 339-203-4276 // Cell: +1 781-526-6310
 Fax : +1 339-203-4288
 - Please contact the customs broker above for any questions regarding customs documentation or clearance.
 - All packages should be addressed to Anthony Fazio at the Broad Institute (see address above)
- The collaborator is responsible for coordinating the appropriate documentation for international shipping with their shipping company. **Any test agents that do not arrive at the Broad by the submission deadline will be held until the following screen.**
- **Any import fees must be paid by the collaborator/shipper**
 - In the specific case of shipping internationally through [FedEx](#), we recommend using the FedEx customs broker to prevent any customs fees from being charged.
